

MEDICAL CHRONOLOGY REPORT

CONDITION SPECIFIC MEDICAL CHRONOLOGY

Patient: John Doe	Client: Law Offices of Laurel Hardy & Associates	Format: Level 2 Chron
DOB: October 20, 1925	Docket / Case#: 23456.4567.345	Client Case Ref: 342356
Current Age: 93	Social Security Num: 473-89-1457	
Gender: Male	Insurance Carrier: The New American Insurance Inc.	

SOCIAL HISTORY

Smoking	March 14, 2018	Hx of 3 ppd for 20 years Quit in 2000
Alcohol	March 14, 2018	Socially only wine
Marital status	March 14, 2018	Married 50 year
Children, ages	March 14, 2018	One son age 45 and one daughter age 42

CURRENT MEDICATIONS

March 14, 2018	Atorvastatin, aspirin, Lexapro, Calcium carb elemental, cyanocobalamin, cholecalciferol, donepezil, fish oil Omega-3 fatty acid, multivitamin PO and Zolpidem
----------------	---

FAMILY HISTORY

Father	Father – heart disease, hypertension and arthritis
Mother	Heart disease
Brother	Diabetes and Parkinson's
Son	Acute leukemia

PERSONAL MEDICAL HISTORY

Arthritis, total right knee replacement, hearing loss, essential tremor, mild cognitive impairment, OSA on CPAP, pseudophakia, bilateral cataract surgery, vitamin B12 deficiency and back pain.

Date	Provider / NPI	Source	Document Type	File Name: Page	Chart Treatment Record	Comments
Memory Loss						
June 23, 2015	1245789013	St Laurent Hospital	Neurology Consult		Difficulty finding words, Anomic aphasia Some difficulty with memory, more forgetful. Brain MRI revealed no acute intracranial process. No enhancing lesions. Chronic small vessel ischemia and involuntal changes. MRA revealed no evidence of any significant stenosis. There is development variation of dominant right, small left vertebral arteries as well as what appears to be a congenitally absent A1 segment of the right anterior cerebral artery. No specific Tx recommended.	
July 7, 2015	1245789013	St Laurent Hospital	Neurology Consult		Mild cognitive impairment with memory loss (Amnesic MCI), MOCA 25/30. Essential tremor. Exam revealed resting tremor present bilaterally, decreased vibration at the toes as well as areflexia at the ankles. TSH and folic acid WNL.	
December 30, 2016	1245789013	St Laurent Hospital	Neurology Consult		Vitamin B12 deficiency. Vitamin B12 283 (210-920). Started on Cyanocobalamin given.	
January 4, 2017	1245789013	St Laurent Hospital	Neurology Follow up		Neuropsych testing confirmed mild cognitive impairment. Sx too mild to qualify for dementia diagnosis. – Vitamin B12 537 (200-1100).	
January 17, 2017	1245789013	St Laurent Hospital	Neurology Follow up		Memory slightly improved with B12 supplements and Aricept.	Records of 2018 are missing
Pericarditis						
July 21, 2015	1045712471	Julian Huges Hospital	Cardiology Consult		Pericarditis, cough chest pain. CXR showed hypoinflation with mild basilar atelectasis. Sed rate 67 (0-20), HGB 11.4 (12.6-17.0). EKG revealed NSR. RBBB.	
August 25, 2015	1045712471	Julian Huges Hospital	Cardiology Consult		Chest pain, palpitation and SOB. Pericardial effusion. CT chest revealed mild pericardial fluid or thickening. No acute airspace disease seen. ANA screen negative. Sed rate 63 (0-20)	
November 3, 2015	1045712471	Julian Huges Hospital	Cardiology Consult		Acute idiopathic pericarditis, improved. Echo showed impaired relaxation pattern of diastolic filling suggestive of grade I diastolic dysfunction. Estimated LVEF 50-55%. Trivial pericardial effusion. Mildly enlarged right ventricle.	Records of 2018 are missing
Sleep Apnea						
November 3, 2017	1579246780	Lady Marion Health Center	Pulmonology Consult		Sleep concern and sleep disordered breathing. Suspected sleep apnea and snoring. Sleep study on 11/06/2017 revealed severe obstructive sleep apnea with AHI of 72.8/hour. No REM sleep was seen on this study. Treatment with CPAP. CPAP titrated to level 12.	
January 31, 2018	1579246780	Lady Marion Health Center	Pulmonology Follow up		Feeling energized since starting PAP therapy. Data from PAP showed average AHI of 19.2.	
March 14, 2018	1579246780	Lady Marion Health Center	Pulmonology Consult		OSA, on CPAP. Not refreshed after waking up. Issues with mask leakage. Estimated AHI 44.2. Pressure adjusted to 12-18 cm. Instructed on weight loss measures.	
Back Pain						

January 31, 2018	1879632014	Lakewood Healthcare	Orthopedic Consult	Chronic midline low back pain w/o sciatica. Lumbar x-ray ordered.
February 12, 2018	1287698532	Lakewood Healthcare	X-ray report.	L-spine x-ray showed multilevel degenerative changes of the lumbar spine. Recommended to continue with PT and Tylenol p.r.n.
