

3 WAYS

TO IMPROVE MEDICAL RECORD REVIEWS

If you are buried in a large number of pdf files, struggling to put the records in date order, hunting for relevant data, manually producing reports, its time to Visualize Medical Records NOW!

ONE PAGE overview of record

Do you start with a folder of pdf files, open them several times to sequence them in understandable order. If so its time to organanize. Spend time visualizing medical data **not buried in it.**

Auditable Review Outcomes

Do you ask yourself: How did I make that statement or where did I get this data. When you use VMR you can recreate any review in minutes.

Multiple Indexes

There is more beyond chronological order. Our visualized medical records are indexed by PROVIDER, EVENT TYPE, DISEASES, DRUGS, ICD9 and 10 Codes and many more.
